## EACH YEAR,

thousands of children are burned and require specialized treatment for their injuries.

In the 1960's, recognizing the lack of medical expertise in treating burns, Shriners of North America opened 4 pediatric hospitals that specialize in burns. These special hospitals were founded with the three-fold purpose of helping children, conducting burn research and training medical personnel in the treatment of burn injuries.

Today, Shriners Hospitals are actively involved in research, and many advances in burn care have been the result of extensive research activities at these specialized Shriners Hospitals.

Shriners Hospitals for Children is operated by Shriners of North America. There are 22 Shriners Hospitals providing specialized pediatric care for orthopedic conditions, burns, spinal cord injuries and cleft lip & palate. There is never a charge for any medical care or services received at Shriners Hospitals, including out-patient care, diagnostic services, surgery, medical care, casts, braces, x-rays, rehab programs and continuation of patients
